Tomás Gonçalves Ribeiro Ferreira

BSc student in Informatics and Computing Engineering · FEUP

Vila do Conde, Portugal • +351 914 351 394 • tomas.r.ferreira@hotmail.com • linkedin.com/in/tomasgrferreira • github.com/tomasrferreira

> **Seeking an internship for the Integrative Project (PI)** course unit of the L.EIC degree at FEUP. Preference for **front-end and the visual side** of web applications, and for **C++ and Python**, while open to any area of development. Available to meet and define the internship plan.

PROFILE

Final-year L.EIC student at FEUP, with project work in web development, systems programming and algorithms. I most enjoy building interfaces and the visual side of things, and working in C++ and Python. Six years as a lifeguard and ten years of competitive swimming taught me to **decide quickly on incomplete information** and to stay level-headed when something goes wrong. That is what I bring to a team.

EDUCATION

Faculty of Engineering, University of Porto (FEUP)

2021 – present

BSc in Informatics and Computing Engineering (L.EIC)

PROJECTS

Plants vs. Zombies: a game in C on from-scratch drivers

Team project · Computer Laboratory (LCOM), FEUP

- Complete game on MINIX built on drivers written from scratch, with an interrupt-driven architecture.
- **Owned the screen flow and the wave system:** the entity selection screen, the menu state machine, and difficulty progression across the intermediate and final waves.

C · MINIX · device programming

QuickBid: online auction platform

Team project · Database and Web Application Laboratory (LBAW), FEUP

- Online auction application in Laravel and PostgreSQL. **Owned the administration area:** account management and role-based authorisation.

PHP · Laravel · PostgreSQL · Docker · JavaScript

Global flight network: graphs in C++

Team project · Algorithms and Data Structures (AED), FEUP

- Network of airports, airlines and flights modelled as a graph, with itinerary search and reachability metrics. Data structures and algorithms work.

C++ · STL · graphs

Ticket Tracker: support ticket management

Team project · Web Languages and Technologies (LTW), FEUP

- Ticket system routed by department, with reply panels for the agents. **Interface built from scratch**, in semantic HTML and responsive CSS.

HTML · CSS · PHP · SQLite

SVG → PNG converter

Individual project · Programming (PROG), FEUP

- SVG parser that draws and writes the final image out to PNG.

C++

EXPERIENCE

Certified Lifeguard (ISN)

2021 – present

Os Golfinhos · beaches of Vila do Conde and Póvoa de Varzim

- Surveillance and assistance of beachgoers: prevention, continuous risk assessment and emergency response, coordinating with the beach team and maritime authorities.

Registered competitive swimmer

2016 – present

Clube Fluvial Vilacondense (CFV)

- Competed in the senior categories; currently in Masters, representing the club at national championships. Ten seasons of daily training balanced against academic commitments.

SKILLS

PROGRAMMING	C++ · Python · HTML/CSS · SQL · C · PHP · JavaScript
TECHNOLOGIES	Laravel · PostgreSQL · SQLite · Docker · Git
PERSONAL	Decision-making under pressure · Responsibility for others' safety · Team coordination · Rigour

ADDITIONAL INFORMATION

COURSES	Essential Project Management for Students · APGEI, Portugal, 2022 (8 h)
LANGUAGES	Portuguese (native) · English (intermediate, secondary education)
OTHER	Lifeguard certification (ISN, Portugal) · Driving licence (Category B)
